Summary of answers to Questionnaire for the Project Coordinator and Project Executive Committee members

Project origin stage			
1	Was an analysis carried out of the existing status of curricula in the area of production management and other areas related to the project topic at participating (and eventually other) Thailand universities?	Mainly all said that an analysis was conducted.	
1	Were there any problems identified to be solved with the project realization? What those problems are?	Were there any problems identified to be solved with the project realization? I am afraid that apart from the PC the PEC members did not understand the question. It was about the problems to be solved BY the project realization not WITHIN the realization.	
2	Is there any document prepared as a result of such an analysis of the current status of those curricula?	Yes. https://msie4.ait.ac.th/wpcontent/ uploads/sites/5/2018/06/List-of- MS-IE-in-Thailand.pdf	
3	How were a Project Coordinator and a project team appointed/selected? Based on which criteria?	The project team was selected based on the competency and commitment of the members in improving the teaching and curriculum. Project teams were selected based on the location of each university to cover the whole country.	
4	Is this project a continuation of another project(s)?	No. This is a new project.	
5	Is it expected that another project will follow and therefore it is conditioned by this project success?	Partners have already discussed a potential to propose a new project as a follow-up to this one. One of the ideas is for the new project to be within the Erasmus Mundus program as a Joint Master between Thai and EU Partners, or ERASMUS+KA1 between Thai and EU.	
Project design stage			
6	Who and how approved the project objectives?	PC drafted the proposal and sought opinion of partner leaders prior to the submission of the proposal.	
7	Who set up the organizational structure of the project?	PC set up the organizational structure which was later on approved by PEC after the project started.	
8	Were the responsibilities and competencies of the project team members at this stage determined?	Yes. During the proposal preparation, the PC listed WPs and tasks for all the WPs and asked partner leaders to express their	

		interests in the tasks according to their
		interests in the tasks according to their
		expertise.
		From responses and the human
		resources each partner indicated, the
		PC summarized and identified roles,
		WP leaders and budgets for all partners.
	How did you define and analyze the risks	The potential technical and managerial
	at this stage?	risks that can occur were defined by the
0		PC in consultation with partners' leaders
9		(and all the WP leaders) and then they
		have been assessed and analyzed by the
		PEC.
	Did individual team members know their	The PC was not sure on this point. He
	competencies and responsibilities at this	assumed that the partners' leaders knew
	stage?	how to select their teams.
	stage:	According to all the PEC members, the
10		,
10		team members did know their potential
		tasks. They were asked to study the
		project at the beginning and individual
		responsibilities were defined after the
		meetings.
Proi	ect planning stage	
170	Was there a defined and approved	Yes. The leaders of WP1, 4, 5 and 6 were
	detailed plan of the extent of the project	asked to come up with a plan for their
	and what will be created by the project -	WP.
11	, ,	
11	work packages, outputs, deliverables and	The plan was reviewed for each WP by
	products?	its members before submitting to QCMB
		for approval and to PEC for final
		approval.
	Was the risk register updated?	The PC said that the WP leaders were
		asked to update the risk register. Some
		of the PEC members said YES, some did
12		not answer to this question (citing N/A),
		some said that they were not involved in
		this action and some were not quite sure
		whether it was updated.
	Did the composition of the project team	Not at the project level, but it was
	change with respect to the previous	changed at individual partners' level.
13	stages?	The PC filled in the role of WP2 co-
	If yes, who was replaced and why?	leader who is taking a long sabbatical
	in yes, who was replaced and why:	leave with no clear plan of coming back.
	Did all the members of the project took	<u> </u>
14	Did all the members of the project team	WP leaders informed their members
	know the updated plan at any given	who attended general assemblies about
	moment?	updated plans that were made available
		on the project website, as well as by
		communications by Line, WhatsApp
		and Zoom applications.

	How did you estimate the length of	Based on the nature of tasks, the
	activities, the overall length of the	numbers of days were identified and used
1.5	project duration?	along with interdependency of tasks to
15		schedule an execution plan of the
		proposal. The WP leaders were asked to
		review the initial execution plan and
	How did you identify the lay muciest	adjust it for their parts. From deliverables planned in the
16	How did you identify the key project activities?	From deliverables planned in the Proposal and at the potential PEC members
10	activities?	meeting.
	How was the project budget put	During the proposal preparation, PC
	together?	identified the WPs and their tasks.
	Who participated in putting the budget	Partner leaders were asked to express
	together?	their team interests.
	Where there any problems when putting	PC estimated the number of days need
17	the budget together?	for each task and allocated to the
		partners expressed their interest to
		participate in that task.
		Budget was allocated based on their
		roles and responsibilities.
		There was no issue on the budget. ???
	Is the documentation from the project	Yes.
	plan stage available?	https://msie4.ait.ac.th/outcome-1-1-
		gapanalysis-working-plan/

		gement-and-communication-planpmcp/
19	Did individual persons know which	Yes, they mainly did at this stage.
	activities they were responsible for?	
Proje	ect implementation stage	
	Was the project team communicating	No. Communication has remained a
	without any major problems?	major problem for the project. Members
		have not communicated enough. PC has
		encouraged WP leaders to call meetings
		to move project forward. Members have
		been encouraged to communicate as
		<u>well.</u>
		Somewhat different opinion (actually a
20		plausible explanation):
		"At the beginning, there were some
		problem in communications because the
		semester periods at Thai and European
		universities are different".
		And additional:
		Later on, the PC distributed equipment
		for Video conference to all the partners.
		That made communication much easier.

In such large projects the communication is always a major issue. At the meeting we did not have problems and everything was OK. Between the kick-off meeting and the second meeting, the communication was not so easy. We ever using email, WhatsApp and shared repositories in the website and in google drive. This asynchronous communication was not easy. After the second meeting and before the third we started using Zoom for facilitating almost weekly meetings. At this point we do not need weekly meetings but we still use Zoom. This was a great add to our project team communication. In my opinion, we are communication. There were no problems with this item. Plant the PEC members agreed that meetings were held according to plan. Did the project team meetings take place in accordance with the adopted rules and plan? There were no problems with this item. Plant the progress was slow. There were no problems with this item. Plant the progress was slow. In addition, there was a replacement of between WP1 leader and co-leader at the beginning of the second year. The leader as long sabbatical leave during after the project started. Some of the PEC members did not know about this???? An excellent example, which will go in Auditing report as an example of good practice: In UMinho team, one member was added because he could add specialized knowledge in ergonomics for 14.0. We leaders were asked to u			The best explanation is this:

Another very good explanation:			Another very good explanation:

		Yes, they were. The quality, quantity and dimension was evaluated by several teams and committees. As an example, as the leader of the WP1, responsible for the main outputs of that work package. Before developing WP1 we approved the plan. After that, every report followed the plan. The approval of each output was first approved in internally in my institution team. After that it was approved by the WP1 team. After that it was approved by the Quality committee. Finally it was approved by the PEC. WP1 delivered 7 reports, which had 28 versions. This number of versions resulted from reviewing the reports and developing the corresponding actions of quality improve.
25	Do you know what you can make decisions about and what is the task of each of the project team members?	Yes, all the PEC members and the PC knew what they can make decisions about.
26	Do the members of the Project Executive Committee know about their tasks and competencies?	Yes, all the PEC members knew what their tasks were. PC was not sure about their awareness of their own competencies.
27	How does the risk management take place?	There is an Action plan written in PMCP and PEC members were reviewing it. WP leaders report on potential risks once a month. Some PEC members are putting too much emphasis on the role of the PC and actually transfer their responsibilities to him.
28	Why do you monitor risks? How do you work with identified risks?	To take prompt action if it actually occurs and to create awareness of WP leaders to try to prevent it from happening and take actions when it happens. Good explanation by the PC.
29	When, how and to whom do you communicate the risk development or arising new risks?	WP leaders communicate possible risks to PC and other PEC members. Some PEC members did not answer questions related to risks at all (# 27 to 30)??? (Answered as N/A???)
30	Which measures have been taken in the project, based on the risk register, or as a part of the project risk management?	Keeping an eye on potential problems and focusing on key activities. An example of proper measures (action taken by PC):

31	How the project budget was monitored and reported (changes, drawing down of the budget, drawing down of the reserves)?	Extra online meetings were conducted to complete WP1 and with the lesson learned, I pushed the WP2 leader to be more active when we started the WP2 and stepped back once we were on track. Through the defined procedures for the financial management. According to the PMCP, all the members were asked to record their timesheets and submit to their partner leaders. The partner leaders were asked to submit their financial update to the PC on a monthly basis.
32	Were there any problems recorded related to compliance with contractual obligations? If yes, what are they? How were those problems eliminated? If not, why? Please, elaborate.	There were no major problems related to the contractual obligations, aside from some problems related to the schedule of the project and some delays in delivering the outputs. Schedules were being updated and outputs delivered with some delay with respect to the original one.
33	What project records do you keep? How are they kept? Are you backing up your data?	Project documentation and soft copies of all partner documents are kept in both PC's personal server, his computer and the project website. Hardcopies are kept in his office. Other PEC members keep their own records and documents, as well. Detailed list is as follows: Partner financial reports, members time sheets and project sheets, responsibilities declaration, travel reports and their documentation, project draft and final outputs, work in progress files, dissemination outputs and records, meetings reports, and other. All the financial documentation is kept in Project Office in paper and in electronic version and by Partner leaders in electronic format. Some draft outputs are kept by members.
34	Who has access to the records and to whom do you pass information/reports on the current development of project management/realization?	All the PEC and project team members have access to documents on the project website. The project secretary also has an access to the hardcopies.
35	Who makes the decision to move / not to move the project into the next stage?	WP leaders, PC and PEC members.
36	Is the documentation from this stage of the project management in available?	Yes. (See answer to question #33.)

Project mid town and ration stars			
Proje	Project mid-term evaluation stage		
	Were all the outputs, planned to be	At the time of mid-term evaluation,	
	realized thus far, implemented, in what	deliverables were completed according	
	amount and quality?	to the plan. The progress after the	
	If not, why?	submission of the mid-term report,	
	Please, elaborate.	however, has been slowed. Task 2.1 and	
		Task 2.2 should have been completed a	
		couple months after the submission.	
		Some PEC members think that the	
		quality of delivering the results can be	
		seen from the quality reports.	
		Some delay was also recorded in	
27		acquiring equipment.	
37		In addition some overlapping of WP2	
		with WP1 was noticed due to delay in	
		WP1 realization "due to its complexity,	
		which was higher than anticipated".	
		Yet, another opinion:	
		"In practice, it appeared the outcome 2.1	
		could not be achieved without outcome	
		2.2 and therefore some further delays	
		appeared".	
		This could point to not quite a proper	
		selection of outcomes. Please, elaborate	
		on that!!!	
	Which parameters of the defined project	PC: "Five focuses under the objective	
	objectives (to be achieved thus far) were	have been implementing. First focus on	
	met / were not met?	modernization of a curriculum has been	
	If not, why?	unofficially completed. We are waiting	
	Please, elaborate.	for WP2 leader to submit a report.	
	110000, 010001000	Second and third focuses on courses and	
		technology are being developed.	
		Fourth focus on quality and EQF have	
38		been implemented.	
		Fifth one on partnership has been	
		implemented since day one".	
		As for now, most of the parameters are	
		met. It is still ongoing activity and all the	
		parameters should be possible to be	
		achieved during implementation.	
		Again, three PEC members answered	
		with N/A???	
	Were all the products, planned to be		
39	realized thus far, implemented?	All of the tasks were executed according	
	If not, why?	to the plan and most of the tasks were	
	Please, elaborate.	<u>completed.</u>	
	माच्यर, धायण्यायाच.		

	T =	
40	Did the project management (Coordinator/PEC) propose recommendations for improving the organization of work?	Yes. WP leaders were normally invited to attend PEC meeting to update the progress and PEC members asked, discussed and suggested, if there was any concern
41	Which measures to improve the project organization were proposed/ implemented? Please, elaborate.	PEC offered suggestion on issues. PC communicated with members at large on progress of tasks and deliverables. Another good explanation: "The follow up of the PC through WP leaders and members help improve both organization and implementation. Normally, we discuss by E-mail and online – meeting". And another: There were 3 versions of the Project Management and Communication Plan (PMCP). Examples: Monthly WP reports; Team reports; Reviewing and approval of outcomes by several teams; Creation of systematic Zoom meetings for content and for management. And another: Enabling the use of internet platform for documentation flow, enabling multi-side access to output documents, creating the mixed Partners teams.
42	How were the project outputs (realized thus far) promoted? Please, elaborate.	The project outcomes were presented in various capacities, including introducing the project and presenting outcomes at both national and international conferences, published promotional materials, organizing workshop and public seminars, talk to industry and communicating with target audience via website, Facebook and YouTube. The actions are described in the Dissemination reports. And another view: Project meetings usually include open seminars for general public, big social media campaign is being introduced, several papers on the project were presented on the conferences, dedicated seminars are organized for different stakeholders in Thailand, associate partners participate in promotional events and activities.

	Were the project outputs (realized thus	Project aims at different stakeholders
	far) duly promoted to stakeholders?	groups including universities, students
	At which stakeholders was the	and academics, companies, educational
43	promotion aimed?	institutions and researchers, public
	Please, elaborate.	authorities and all of these groups are
		addressed with different dissemination
		activities.
	Do you consider that the project is a	PC:
	success thus far, i.e. are the project	Somewhat. I wish it could be better but
	objectives met within the planned	what we have completed is acceptable.
	deadline(s) using the planned funds?	Other PEC members:
	Are all the predicted indicators and	Somewhat success. The project is still in
	outputs (thus far) met?	progress.
	Please, elaborate.	I consider the project is quite success,
		even though some works are a little delay
		but we can cover them to meet the
		deadline and the quality of the deliverables.
44		Not completely.
77		Yes, the project is a success so far. At this
		point we can say that are meeting the
		objectives in the planned deadlines with
		the planned funds.
		Project is a success for the moment due
		to its high visibility, raised interested
		among its key stakeholders and sound
		outcome flow. It seems that the major
		output, namely MSc in IE curriculum is
		innovative and attractive enough to meet
		the predicted expectations of the project.
45	Is the documentation from this stage of	Yes.
	the project management available?	DC.
	Is there anything you would like to add?	PC:
		Familiarity of members to the procedures and requirements needs to be impro-
		ved.
		Mid-term report and Annex C are avai-
		lable on the project website.
		We are not yet at our best. I have not yet
46		been able to bring up the best of every
		single member.
		Other PEC members:
		Somewhat success. The project is still in
		progress. However the communication
		of the current WP seems to be slow and
		not clear.
		I admire EU partners. They gave many
		ideas through discussions that make our
1		success.

Currently, it is in the last stage of the project, the serious action need to conduct. The way in which the work was structured and divided between different teams it may look a little bit too complicated.
This is being a challenging and motivating project so far.
